

## Project 2: React CRUD Assessment Rubric

	10-9	8-7	6-5	4-0
Functionality	<p>Applications demonstrate comprehensive &amp; robust evidence on the following:</p> <ul style="list-style-type: none"> <li>• Register a new user via a form.</li> <li>• User can login and logout.</li> <li>• API data requested from API resource groups using Axios.</li> <li>• Create, update &amp; delete API data via modal.</li> <li>• View API data in a table using an id and a variety of query parameters.</li> <li>• Incorrectly formatted form fields are handled using validation error messages.</li> <li>• Data automatically re-rendered after creating, updating and deleting.</li> <li>• API data paginated across several pages.</li> <li>• UI styled with Reactstrap.</li> <li>• Application deployed to Heroku.</li> <li>• Components tested using React Testing Library.</li> </ul>	<p>Applications demonstrate clear &amp; detailed evidence on the following:</p> <ul style="list-style-type: none"> <li>• Register a new user via a form.</li> <li>• User can login and logout.</li> <li>• API data requested from API resource groups using Axios.</li> <li>• Create, update &amp; delete API data via modal.</li> <li>• View API data in a table using an id and a variety of query parameters.</li> <li>• Incorrectly formatted form fields are handled using validation error messages.</li> <li>• Data automatically re-rendered after creating, updating and deleting.</li> <li>• API data paginated across several pages.</li> <li>• UI styled with Reactstrap.</li> <li>• Application deployed to Heroku.</li> <li>• Components tested using React Testing Library.</li> </ul>	<p>Applications demonstrate evidence on the following:</p> <ul style="list-style-type: none"> <li>• Register a new user via a form.</li> <li>• User can login and logout.</li> <li>• API data requested from API resource groups using Axios.</li> <li>• Create, update &amp; delete API data via modal.</li> <li>• View API data in a table using an id and a variety of query parameters.</li> <li>• Incorrectly formatted form fields are handled using validation error messages.</li> <li>• Data automatically re-rendered after creating, updating and deleting.</li> <li>• API data paginated across several pages.</li> <li>• UI styled with Reactstrap.</li> <li>• Application deployed to Heroku.</li> <li>• Components tested using React Testing Library.</li> </ul>	<p>Applications does not, or does not fully demonstrate evidence on the following:</p> <ul style="list-style-type: none"> <li>• Register a new user via a form.</li> <li>• User can login and logout.</li> <li>• API data requested from API resource groups using Axios.</li> <li>• Create, update &amp; delete API data via modal.</li> <li>• View API data in a table using an id and a variety of query parameters.</li> <li>• Incorrectly formatted form fields are handled using validation error messages.</li> <li>• Data automatically re-rendered after creating, updating and deleting.</li> <li>• API data paginated across several pages.</li> <li>• UI styled with Reactstrap.</li> <li>• Application deployed to Heroku.</li> <li>• Components tested using React Testing Library.</li> </ul>

<b>Code Elegance</b>	<p>Applications thoroughly demonstrate code elegance on the following:</p> <ul style="list-style-type: none"> <li>• Appropriate use of control flow, data structures and in-built functions.</li> <li>• Sufficient code modularity.</li> <li>• Components written as functional, not class.</li> <li>• Adheres to client-server architecture.</li> <li>• Header &amp; in-line comments explain complex logic.</li> <li>• Formatted code using Prettier &amp; npm script.</li> <li>• No dead or unused code.</li> </ul>	<p>Applications clearly demonstrate code elegance on the following:</p> <ul style="list-style-type: none"> <li>• Appropriate use of control flow, data structures and in-built functions.</li> <li>• Sufficient code modularity.</li> <li>• Components written as functional, not class.</li> <li>• Adheres to client-server architecture.</li> <li>• Header &amp; in-line comments explain complex logic.</li> <li>• Formatted code using Prettier &amp; npm script.</li> <li>• No dead or unused code.</li> </ul>	<p>Applications demonstrate code elegance on the following:</p> <ul style="list-style-type: none"> <li>• Appropriate use of control flow, data structures and in-built functions.</li> <li>• Sufficient code modularity.</li> <li>• Components written as functional, not class.</li> <li>• Adheres to client-server architecture.</li> <li>• Header &amp; in-line comments explain complex logic.</li> <li>• Formatted code using Prettier &amp; npm script.</li> <li>• No dead or unused code.</li> </ul>	<p>Applications does not or does not fully demonstrate code elegance on the following:</p> <ul style="list-style-type: none"> <li>• Appropriate use of control flow, data structures and in-built functions.</li> <li>• Sufficient code modularity.</li> <li>• Components written as functional, not class.</li> <li>• Adheres to client-server architecture.</li> <li>• Header &amp; in-line comments explain complex logic.</li> <li>• Formatted code using Prettier &amp; npm script.</li> <li>• No dead or unused code.</li> </ul>
<b>Documentation &amp; Git Usage</b>	<p>README file contains thorough evidence of:</p> <ul style="list-style-type: none"> <li>• URL to application on Heroku.</li> <li>• How to setup the environment for development &amp; deploy the application.</li> </ul> <p>Git branches are thoroughly named with convention &amp; contain the correct code relating to the functional requirement.</p> <p>Git commit messages are comprehensively formatted &amp; reflect the functionality changes in succinct detail.</p>	<p>README file contains clear evidence of:</p> <ul style="list-style-type: none"> <li>• URL to application on Heroku.</li> <li>• How to setup the environment for development &amp; deploy the application.</li> </ul> <p>Git branches are mostly named with convention &amp; contain the correct code relating to the functional requirement.</p> <p>Git commit messages are clearly formatted &amp; reflect the functionality changes in substantial detail.</p>	<p>README file contains evidence of:</p> <ul style="list-style-type: none"> <li>• URL to application on Heroku.</li> <li>• How to setup the environment for development &amp; deploy the application.</li> </ul> <p>Some git branches are named with convention &amp; contain the correct code relating to the functional requirement.</p> <p>Git commit messages are formatted &amp; reflect the functionality changes in detail.</p>	<p>README file does not or does not fully contain evidence of:</p> <ul style="list-style-type: none"> <li>• URL to application on Heroku.</li> <li>• How to setup the environment for development &amp; deploy the application.</li> </ul> <p>Git branches are not or are not fully named with convention &amp; do not or do not fully contain the correct code relating to the functional requirement.</p> <p>Git commit messages are not or are not fully formatted &amp; do not or do not reflect the functionality changes.</p>

# Project 2: React CRUD App Marking Cover Sheet

Name:

Date:

Learner ID:

Assessor's Name:

Assessor's Signature:

Criteria	Out Of	Weighting	Final Result
Functionality	10	40	
Code Elegance	10	45	
Documentation & Git Usage	10	15	
Final Result			/100
This assessment is worth 50% of the final mark for the Introductory Application Development Concepts course.			

**Feedback:**
